

ACUPUNCTURE & ORIENTAL HERBAL MEDICINE

What is Acupuncture?

Acupuncture treatment involves placement of very fine and sterile needles into acupuncture points on the body. Acupuncture has helped billions of people for thousands of years in Asia. It has been used for at least 3,000 years. Now it is used all over the world.

How does Acupuncture work?

Unique signal from acupuncture point can direct or help the body to bring back natural balance and flow.

What is Herbal Medicine and how does it work?

Herbal medicine is composed of whole and/or part plants, flowers, and minerals. Herbal medicine can stimulate the body to regulate and/or strengthen the immune system. Herbal medicine can also aid the fight against viruses, bacteria, inflammation, pain and/or auto-immune disorders. Herbal medicine can be used to treat disorders of internal organs and many other types of diseases. However, *Oriental* herbal medicine is different from herbal supplements and over the counter remedies people use in America. Oriental herbal medicine should only be prescribed and handled by a licensed acupuncturist, someone who has acquired national certification through formal training in oriental herbology.

Jae Moon, L. Ac., MSOM

Extraordinary Acupuncture and Well-Being Specialist

Jae Moon, L.Ac, MSOM is a third generation acupuncturist and herbal medicine specialist. He is a certified and licensed acupuncturist practicing oriental herbal medicine and body therapy. He was a senior instructor at the New York College of Traditional Chinese Medicine, Mineola, NY.

He treats simple to complex pain, fatigue, stress, all types of injuries, and many other health conditions. He also treats artists (i.e. vocalist, musicians, painters and theater performers) to improve and enhance their level performance.

Jae Moon has treated many patient's diagnosed with irreversible diseases. After receiving his treatments, some of those patients made substantial health improvements. Many patients received positive lab works/test results and are now medication and treatment free.

Jae Moon's patients often feel the change in their conditions within the first few treatments. His unique acupuncture and herbal treatments are based on classical pulse diagnosis and special acupuncture techniques coming from lineages of Korean Saam Four Needle technique, classical NeiJing and NanJing acupuncture techniques, classical SuWen and 5 phase pulse diagnosis, and other classical methods.

Previous surgery may not affect the outcome of acupuncture treatment.

Jae Moon's patients and their success cases

CASE 1: Chronic Fatigue Syndrome for several years, female, mid 40's

The patient felt drastic improvement from the first visit. Patient has normal life now.

CASE 2: Rapid Heart Beat (RSVT: Tachycardia), female, early 50's

The patient had heart rate of 120-130's per minute before treatment. The heart rate went down to upper 80's and low 90's in 3 months. The heart rate is now 60's to 70's without medication and no pace-maker.

CASE 3: Immobilized Shoulder for 8 months, male, mid 40's

The patient had shoulder and neck pain. Patient used was treated mainly with herbal medication. Patient is free of pain now..

CASE 4: Chronic Lung Disease (IPF), female, early 50's

The patient had lung surgery and was expected to live about 1.5 years. The patient was barely able to move out of bed with excruciating breathing pain. After receiving my treatment, the patient is now pain free with breathing. The patient also has had 6 consecutive lung tests which showed marked improvements in the lung tissue. It has been 5 years since I treated the patient and the patient is still living healthy today.

CASE 5: Chronic Migraine Headache for 30 years, female, early 40's

The patient had severe migraine headache since the early teens with photophobia, nausea, and fatigue. After receiving acupuncture treatments, she is migraine free.

CASE 6: Crossed Eye from birth, male, toddler

Diagnosed with Duane Syndrome. The patient had 3 months of acupuncture Treatments. The pediatric eye specialist found no signs of crossing of the eye. The patient's eyes have been fine for 2 years without having to receive any medical treatment.

CASE 7: Fall from a ladder, male, 20's

Patient was not able to breath deeply due to rib pain which was caused by a fall from a ladder. Pain was completely gone after one acupuncture treatment

CASE 8: Face and eye paralysis, female, 30's

After the first acupuncture and herbal medicine treatment, the patient was feeling better. After 2 months of treatment, the patient was completely cured from facial paralysis.
